Conclusions

UI GM 2018 Bologna's score 1,575 over 1800 25th ranked in the category Education

THE impact ranking 2018 Bologna ranked 9th over > 400 universities

- tangible attention to all themes of sustainability from both the research component and the educational dimension, but not always tuned
- When the UniBo research appears stronger both in terms of the average publications per capita and in comparison with a sample of non-Italian universities, the related Teaching & Learning activities do not always follow closely
- Physiological gap of time to transfer research results to course units
- Reducing this gap would lead to a mutual improvement
